The 3M 8210 N95 Particulate Respirator is designed to help provide quality, reliable worker protection against certain non-oil based particles. The 8210 offers a number of benefits to you and your workers.

- **Meets NIOSH 42 CFR 84 N95 requirements.** TC-84A-0007
- **Excellent worker protection**
  Because they are comfortable to wear and easy to use, workers are quick to accept and use maintenance-free respirators, like the 8210. Studies have shown they can provide protection equivalent to a rubber facepiece respirator… at much lower cost and greater convenience.
- **Lightweight construction**
  - Promotes greater worker comfort.
  - Contributes to increased wear time.
- **All filter design**
  - Provides economical protection.
  - No spare parts to clean and maintain.
  - Promotes easier communication.
- **Advanced Electret Media (AEM)**
  - Enables the respirator to filter effectively without sacrificing breathability.
- **Adjustable noseclip**
  - Helps provide a custom fit and secure seal.
  - Reduces the potential for eyewear fogging.

**Suggested Applications**
- Grinding
- Sanding
- Sweeping
- Bagging
- Other dusty operations

**Use For:**
- Solids such as those from processing minerals, coal, iron ore, flour, and certain other substances.
- Liquid or non-oil based particles from sprays that do not also emit harmful vapors.

**Do Not Use For:**
Paint spray, oil aerosols, gases, vapors, asbestos or sandblasting, aerosol concentrations that exceed 10 times the OSHA PEL, or applicable government regulations, whichever is lower. This respirator does not supply oxygen.

**Time Use Limitation:**
If respirator becomes damaged, soiled, or breathing becomes difficult, leave the contaminated area and dispose of the respirator.

This respirator contains no components made from natural rubber latex.

The 3M 8212 N95 Particulate Respirator is designed for applications such as welding, soldering and other operations where metal fumes are present. The 8212 provides a minimum filter efficiency of 95% against non-oil based particles. This product’s many features provide workers comfortable, durable respiratory protection.

- Meets NIOSH 42 CFR 84 N95 requirements. TC-84A-0454
- 3M Cool Flow Exhalation Valve - Patented one-way valve offers easy exhalation and cool, dry comfort.
- Cake-resistant filter media - Uniquely-designed filter layers reduce the caking of particles on the respirator surface.
  - Helps make the respirator breathe easier longer, which contributes to longer service life and increased savings.
- Faceseal
  - Comfortable to wear.
  - Contours easily to help provide a good seal.
- Lightweight construction
  - Promotes greater worker comfort.
- All filter design
  - Provides economical protection.
  - No spare parts to maintain.
  - Promotes easier communication.
- Adjustable noseclip
  - Helps provide a custom fit and secure seal.
  - Reduces the potential for eyewear fogging.
- Fully adjustable straps
  - A single tug helps provide a comfortable, secure fit.

Suggested Applications
- Welding
- Brazing
- Soldering
- Torch cutting
- Metal pouring
- Grinding
- Sanding
- Sweeping
- Bagging
- Other dusty/hot operations

Use For:
- Solids such as those from processing minerals, coal, iron ore, flour, and certain other substances.
- Liquid or non-oil based particles from sprays that do not also emit harmful vapors.
- Metal fumes produced from welding, cutting and other operations involving heating of metals.

Do Not Use For:
Paint spray, oil aerosols, gases, vapors, asbestos or sandblasting. Aerosol concentrations that exceed 10 times the OSHA PEL, or applicable government regulations, whichever is lower. This respirator does not supply oxygen.

This respirator contains no components made from natural rubber latex.

Time Use Limitation:
If respirator becomes damaged, soiled, or breathing becomes difficult, leave the contaminated area and dispose of the respirator.

Respirators Per Box: 10
Respirators Per Case: 80
The 3M 8233 N100 Particulate Respirator is well suited for those who want NIOSH’s highest rated filtration efficiency in a maintenance free respirator. It provides a minimum filter efficiency of 99.97% against non-oil based particles. This respirator is an excellent choice for lead abatement, pharmaceutical manufacturing, welding and work involving substance specific regulated particles excluding those containing oil aerosols and asbestos.

The 8233 offers a number of benefits to you and your workers:

- Meets NIOSH 42 CFR 84 N100 requirements TC-84A-1298
- 3M Cool Flow Exhalation Valve - Patented one-way valve offers easy exhalation and cool, dry comfort.
- Face seal - Comfortable to wear.
- Contours easily to help provide a good seal.
- Adjustable noseclip - Helps provide a custom fit and secure seal.
- Reduces the potential for eyewear fogging.
- Lightweight construction - Promotes greater worker comfort.
- Contributes to increased wear time.
- All filter design - Provides economical protection.
- No spare parts to maintain.
- Promotes easier communication.

Suggested Applications
- OSHA substance specific particle exposures
  - Lead
  - Cadmium
  - Arsenic
  - 4,4'-Diaminodiphenylmethane (MDA)
- Pharmaceutical manufacturing
- Welding
- Brazing
- Soldering
- Torch cutting
- Metal pouring

Use For:
- Solids such as those from processing minerals, coal, iron ore, flour, and certain other substances.
- Liquid or non-oil based particles from sprays that do not also emit harmful vapors.
- Metal fumes produced from welding, cutting and other operations involving heating of metals.

Do Not Use For:
Paint spray, oil aerosols, gases, vapors, asbestos or sandblasting. Aerosol concentrations that exceed 10 times the OSHA PEL, or applicable government regulations, whichever is lower. This respirator does not supply oxygen.

The 3M 8240 N95 Particulate Respirator is designed to help provide quality, reliable worker protection against certain oil and non-oil based particles. It is an excellent choice for those who have work environments that may contain oil aerosols. The 8240 offers a number of benefits to you and your workers.

- **Meets NIOSH 42 CFR 84 R95 requirements.**
  TC-84A-1350

- **Excellent worker protection**
  - Because they are comfortable to wear and easy to use, workers are quick to accept and use maintenance-free respirators, like the 8240.

- **Lightweight construction**
  - Promotes greater worker comfort.
  - Contributes to increased wear time.

- **All filter design**
  - Provides economical protection.
  - No spare parts to clean and maintain.
  - Promotes easier communication.

- **Collapse Resistant Shell**
  - Increased durability
  - Reliable in most hot, humid conditions.

- **M-noseclip**
  - Adjusts easily with fewer pressure points and greater comfort.
  - Reduces the potential for eyewear fogging.
  - Helps provide a custom fit.

**Suggested Applications**

- Grinding
- Sanding
- Sweeping
- Machining
- Other dusty/oily operations

**Use For:**
Solids such as those from processing minerals, coal, iron ore, flour, and certain other substances.

Liquid or oil based particles from sprays that do not also emit harmful vapors.

**Do Not Use For:**
Paint spray, gas, vapors, asbestos or sandblasting, aerosol concentrations that exceed 10 times the OSHA PEL, or applicable government regulations, whichever is lower. This respirator does not supply oxygen.

**Time Use Limitation**
If respirator becomes damaged, soiled, or breathing becomes difficult, leave the contaminated area and dispose of the respirator. If oil aerosols are present, time use may be limited to 8 hours of continuous or intermittent use.

This respirator contains no components made from natural rubber latex.

Nuisance Level Acid Gas Relief
The 3M 8246 R95 Particulate Respirator provides reliable worker protection against certain oil and non-oil based aerosol particles including those present with nuisance levels of acid gases such as sulphur dioxide, hydrogen fluoride and/or chlorine. This respirator offers a number of benefits to you and your workers:

- **Meets NIOSH 42 CFR 84 R95 requirements.** TC~84A-1350.
- **Lightweight construction**
  - Promotes greater worker comfort.
  - Contributes to increased wear time.
- **All filter design**
  - Provides economical protection.
  - No spare parts to maintain.
  - Promotes easier communication.
- **Adjustable noseclip**
  - Helps provide a custom fit and secure seal.
  - Reduces the potential for eyewear fogging.

Suggested Applications
- Glass etching
- Chemical processing
- Paper processing
- Brewing operations
- Aluminium smelting

Use For:
- Solids such as those from processing minerals, coal, iron ore, cotton, flour, and certain other substances.
- Liquid or oil based particles from sprays that do not also emit harmful vapors.
- Nuisance level acid gases such as Sulfur Dioxide, Hydrogen Fluoride and/or Chlorine.

Do Not Use For:
Paint spray, vapors, asbestos or sandblasting. Do not use when concentrations of acid gases exceed the OSHA PEL or applicable government occupational exposure limits, whichever is lower. This respirator does not supply oxygen. Aerosol concentrations that exceed 10 times the OSHA PEL, or applicable government regulations, whichever is lower.

Time Use Limitation:
If respirator becomes damaged, soiled, or breathing becomes difficult, leave the contaminated area and dispose of the respirator. If oil aerosols are present time use may be limited to 8 hours of continuous or intermittent use.

This respirator contains no components made from natural rubber latex.

Nuisance Level Organic Vapor Relief

The 3M 8247 R95 Particulate Respirator is designed to help provide reliable worker protection against certain oil and non-oil based particles including those present with nuisance levels of organic vapors such as solvents, degreasers, and resins.

This respirator offers a number of benefits to you and your workers:

• Meets NIOSH 42 CFR 84 R95 requirements TC-84A-1350
• Lightweight construction
  - Promotes greater worker comfort.
  - Contributes to increased wear time.
• All filter design
  - Provides economical protection.
  - No spare parts to clean and maintain.
  - Promotes easier communication.
• Adjustable noseclip
  - Helps provide a custom fit and secure seal.
  - Reduces the potential for eyewear fogging.

Suggested Applications

• Foundry operations
• Lab settings
• Agriculture
• Petrochemical manufacturing
• Undercoating

Use For:

• Solids such as those from processing minerals, coal, iron ore, cotton, flour, and certain other substances.
• Liquid or oil based particles from sprays that do not also emit harmful vapors.
• Nuisance level organic vapor relief.

Do Not Use For:

Paint spray, gases, asbestos or sandblasting. Aerosol concentrations that exceed 10 times the OSHA PEL or applicable government regulations, whichever is lower. Do not use when concentrations of organic vapors exceed the OSHA PEL or applicable government occupational exposure limits, whichever is lower. This respirator does not supply oxygen.

Time Use Limitation:

If respirator becomes damaged, soiled, or breathing becomes difficult, leave the contaminated area and dispose of the respirator. If oil aerosols are present, time use may be limited to 8 hours of continuous or intermittent use.

This respirator contains no components made from natural rubber latex.

The 3M 8271 P95 Particulate Respirator combines P-series versatility with exceptional comfort and fit. It is an excellent choice for those who have work environments that may contain oil aerosols.

This respirator offers a number of benefits to you and your workers:

- **Meets NIOSH 42 CFR 84 P95 requirements. TC-84A-1166**
- **3M Cool Flow Exhalation Valve**
  - Patented one-way valve offers easy exhalation and cool, dry comfort.
- **M-noseclip**
  - Adjusts easily with fewer pressure points and greater comfort.
  - Reduces the potential for eyewear fogging.
  - Helps provide a custom fit and secure seal.
- **Faceseal**
  - Comfortable to wear.
  - Conforms easily to help provide a good seal across a wide range of faces.
- **Lightweight construction**
  - Promotes greater worker comfort.
  - Contributes to increased wear time.
- **All filter design**
  - Provides economical protection.
  - No spare parts to clean and maintain.
  - Promotes easier communication.

**Suggested Applications**

Respirators Per Box: 10
Respirators Per Case: 80
The 3M 8214 N95 Particulate Respirator is designed for applications such as welding, soldering and other operations involving metal fumes including those with ozone and nuisance levels of organic vapors. The 8514 provides a minimum filter efficiency of 95% against non-oil based particles. This product’s many features help provide workers comfortable, durable respiratory protection. Meets NIOSH 42 CFR 84 N95 requirements. TC-84A-0454

- **3M Cool Flow Exhalation Valve**
  - Patented one-way valve offers easy exhalation for cooler dry comfort.

- **Cake-resistant filter media**
  - Uniquely-designed filter layers reduce the caking of particles on the respirator surface.
  - Helps make the respirator breathe easier longer, which contributes to comfort, longer service life and increased savings.

- **Lightweight construction**
  - Promotes greater worker comfort.

- **All filter design**
  - Provides economical protection.
  - No spare parts to maintain.
  - Promotes easier communication.

- **Adjustable noseclip**
  - Helps provide a custom fit and secure seal.
  - Reduces the potential for eyewear fogging.

- **Fully adjustable straps**
  - A single tug helps provide a comfortable, secure fit.

- **Suggested Applications**
  - Welding
  - Brazing
  - Soldering
  - Torch culling
  - Metal pouring
  - Grinding
  - Sanding
  - Sweeping
  - Bagging
  - Other dusty/hot operations
  - Foundry operations
  - Lab settings
  - Petrochemical operations
  - Undercoating

**Use For:**
- Solids such as those from processing minerals, coal, iron ore, flour, and certain other substances.
- Liquid or non-oil based particles from sprays that do not also emit harmful vapors.
- Metal fumes produced from welding, cutting and other operations involving heating of metals.

**Do Not Use For:**
Paint spray, oil aerosol, gases, asbestos or sandblasting. Aerosol and/or ozone concentrations that exceed 10 times the OSHA PEL, or applicable government regulations, whichever is lower. Do not use when concentrations or organic vapors exceed the OSHA PEL or applicable government occupational exposure limits, whichever is lower. These respirators do not supply oxygen.

**Time Use Limitation:**
If respirator becomes damaged, soiled, or breathing becomes difficult, leave the contaminated area and dispose of the respirator.

Nuisance Level Acid Gas Relief
The 3M 8576 P95 Particulate Respirator is designed to provide comfortable, reliable worker protection against certain oil and non-oil based aerosol particles including those present with nuisance levels of acid gases such as sulphur dioxide, hydrogen fluoride and/or chlorine.

An excellent choice for work settings that involve heat, humidity and long periods of wear.

The 8576 offers a number of benefits to you and your workers:

• Meets NIOSH 42 CFR 84 P95 requirements. TC-84A-1166

• 3M Cool Flow Exhalation Valve
  - Patented one-way valve for easy exhalation and cool, dry comfort.

• M-noseclip
  - Adjusts easily for fewer pressure points and greater comfort.
  - Reduces the potential for eyewear fogging.
  - Helps provide a custom fit and secure seal.

• Lightweight construction
  - Promotes greater worker comfort.
  - Contributes to increased wear time.

• All filter design
  - Provides economical protection.
  - No spare parts to clean and maintain.
  - Promotes easier communication.

Suggested Applications
• Glass etching
• Chemical processing
• Paper processing
• Brewing operations
• Aluminum smelting

Use For:
• Solids such as those from processing minerals, coal, iron ore, cotton, flour, and certain other substances.
• Liquid or oil based particles from sprays that do not also emit harmful vapors.
• Nuisance level acid gases such as Sulfur Dioxide, Hydrogen Fluoride and/or Chlorine.

Do Not Use For:
Paint spray, vapors, asbestos or sandblasting. Do not use when concentrations of acid gases exceed the 051-lA PEL or applicable government occupational exposure limits, whichever is lower. Aerosol concentrations that exceed 10 times the OSHA PEL, or applicable government regulations whichever is lower. This respirator does not supply oxygen.

Time Use Limitation:
If respirator becomes damaged, soiled, or breathing becomes difficult, leave the contaminated area and dispose of the respirator. If used in environments containing only oil aerosols, dispose of respirator after 40 hours of use or 30 days, whichever is first.

This respirator contains no components made from natural rubber latex.

Nuisance Level Organic Vapor Relief

The 3M 8577 P95 Particulate Respirator is designed to help provide comfortable, reliable worker protection against certain oil and non-oil based aerosol particles including those present with nuisance levels of organic vapors such as solvents, degreasers and resins.

An excellent choice for work settings involving heat, humidity, and long periods of wear. This respirator offers a number of benefits to you and your workers:

- Meets NIOSH 42 CFR 84 P95 requirements. TC-84A-1166
- 3M Cool Flow Exhalation Valve
  - Patented one-way valve offers easy exhalation and cool, dry comfort.
- M-noseclip
  - Adjusts easily for fewer pressure points and greater comfort.
  - Reduces the potential for eyewear fogging.
  - Helps provide a custom fit and secure seal.
- Lightweight construction
  - Promotes greater worker comfort.
  - Contributes to increased wear time.
- All filter design
  - Provides economical protection.
  - No spare parts to clean and maintain.
  - Promotes easier communication.

Suggested Applications

- Foundry operations
- Lab settings
- Agriculture
- Petrochemical manufacturing
- Undercoating

Use For:

- Solids such as those from processing minerals, coal, iron ore, cotton, flour, and certain other substances.
- Liquid or oil based particles from sprays that do not also emit harmful vapors.

Do Not Use For:

Paint spray, gases, asbestos or sandblasting. Aerosol concentrations that exceed 10 times the OSHA PEL or applicable government regulations, whichever is lower. Do not use when concentrations of organic vapors exceed the OSHA PEL or applicable government occupational exposure limits, whichever is lower. This respirator does not supply oxygen.

Time Use Limitation:

If respirator becomes damaged, soiled, or breathing becomes difficult, leave the contaminated area and dispose of the respirator. If used in environments containing only oil aerosols, dispose of respirator after 40 hours of use or 30 days, whichever is first.

This respirator contains no components made from natural rubber latex.

2071 P95 Particulate Filter
The 3M 2071 P95 Particulate Filter with advanced filtration technology has been developed with your respiratory needs in mind.

The 2071 provides you and your workers:

- **Comfort.** 3M’s advanced filter technology provides a lightweight, easy breathing combination not found in fiberglass containing filters.
- **Versatile protection.** The 2071 is well suited for a wide range of oil and non-oil based particulate contaminants. This filter is ideal for grinding, welding, sanding, sawing, sweeping, bagging or as a prefilter for certain chemical exposures.
- **Simplicity.** The versatility of this filter reduces your inventory and training requirements.
- **Compatibility.** The 2071 can be used with 3M’s wide variety of half and full facepieces.
- **Durability.** The unique flexible filter resists abrasion and wetting.

**Suggested Applications**

- Grinding
- Welding
- Sanding
- Sawing
- Sweeping
- Bagging
- Other dusty, oily operations
- Welding
- Torch cutting
- Brazing
- Soldering

**Use For:**
Solids such as those from processing minerals, coal, iron ore, cotton, flour, and certain other substances.

- Liquid or oil based particles from sprays that do not also emit harmful vapors.
- Metal fumes produced from welding, brazing, cutting and other operations involving heating of metals.

**Do Not Use For:**
Gases and vapors including those present in paint spraying operations, unless combined with approved chemical cartridges. Asbestos, Sandblasting. This respirator filter does not supply oxygen. Concentrations that exceed 10 times the OSHA PEL, with a half facepiece, or 50 times the PEL with a full facepiece or applicable government regulations, whichever is lower.

**Time Use Limitation:**
If filter becomes damaged, soiled, or breathing becomes difficult, leave the contaminated area and dispose of the filter. If used in environments containing only oil aerosols, dispose of filter after 40 hours of use or 30 days, whichever is first.

2076HF P95 Particulate/Hydrogen Fluoride Cartridge with Nuisance Level Acid Gas Relief
The 3M 2076HF P95 Cartridge featuring 3M Advanced Electret Media has been developed with your respiratory needs in mind.

The 2076HF provides you and your workers:

- **Comfort.** The uniquely designed 2076HF cartridge is lighter and easier to breathe through than competitive cartridge/filter combinations.
- **Versatile protection.** The 2076HF is well suited for a wide range of oil and non-oil based particulate contaminants, hydrogen fluoride and nuisance levels of acid gases.
- **Economy.** The 2076HF is attractively priced in comparison to filter/cartridge combinations.
- **Simplicity.** With the versatility this P-series filter provides, your inventory and training requirements are reduced. The design makes the product easy for workers to use.
- **Compatibility.** The 2076HF can be used with 3M’s wide variety of half and full facepieces.
- **Durability.** Unique flexible filter material enables the product to be worn in close quarters. Its rugged construction resists abrasion and wetting.

**Suggested Applications**

- Aluminum smelting
- Glass Etching
- Chemical manufacturing

**Use For:**
- Solids such as those from processing minerals, coal, iron ore, cotton, flour, and certain other substances.
- Liquid or oil based particles from sprays that do not also emit harmful vapors.
- Metal fumes produced from welding, brazing, cutting and other operations involving heating of metals.
- Hydrogen Fluoride gas up to 10 times PEL. Acid gases such as Sulfur Dioxide and/or Chlorine below the OSHA PEL or applicable government standards, whichever is lower.
3M Particulate Filters

Do Not Use For:
Gases and vapors other than Hydrogen Fluoride, when concentrations exceed the OSHA PEL, or applicable government standards, whichever is lower, including those present in paint spray operations, unless combined with approved chemical cartridges. Asbestos. Sandblasting. This respirator cartridge does not supply oxygen. Concentrations that exceed 10 times the OSHA PEL with a half facepiece or 50 times the PEL with a full facepiece or applicable government regulations, whichever is lower.

Time Use Limitation:
If respirator cartridge becomes damaged, soiled, or breathing becomes difficult, leave the contaminated area and dispose of the respirator cartridge. If used in environments containing only oil aerosols, dispose of respirator cartridge after 40 hours of use or 30 days, whichever is first.

2078 P95
Particulate Filter with Nuisance Level Acid Gas and Organic Vapor Relief

The 3M 2078 P95 Particulate Filter with 3M Advanced Electret Media technology has been developed with your respiratory needs in mind.

The 2078 provides you and your workers:
- **Durability.** Unique flexible filter material enables the product to be worn in close quarters. Its rugged construction resists abrasion and wetting.
- **Economy.** The 2078, excellent for nuisance level odors, is priced considerably lower than filter/cartridge combinations.

Suggested Applications
- Utilities operations
- Chemical manufacturing
- Welding
- Torch cutting
- Brazing
- Soldering
- Aluminum smelting

Use For:
- Solids such as those from processing minerals, coal, iron ore, cotton, flour, and certain other substances.
- Liquid or oil based particles from sprays that do not also emit harmful vapors.
- Metal fumes produced from welding, brazing, cutting and other operations involving heating of metals.
- Gases such as Sulfur Dioxide, Hydrogen Fluoride and/or Chlorine below the OSHA PEL, or applicable government standards, whichever is lower. Organic vapors below the OSHA PEL, or applicable government regulations, whichever is lower.

Do Not Use For:
Gases and vapors when concentrations exceed the OSHA PEL, or applicable government standards, whichever is lower, including those present in paint spray operations, unless combined with approved chemical cartridges. Asbestos. Sandblasting. This respirator filter does not supply oxygen. Concentrations that exceed 10 time the OSHA PEL with a half facepiece or 50 times the PEL with a full facepiece or applicable government regulations. whichever is lower.

Time Use Limitation:
If filter becomes damaged, soiled, or breathing becomes difficult, leave the contaminated area and dispose of the filter. If used in environments containing only oil aerosols, dispose of filter after 40 hours of use or 30 days, whichever is fast.

2091 P100 Particulate Filter

The 3M 2091 P100 Particulate Filter has been developed with your respiratory needs in mind.

The 2091 provides you and your workers:

- **Comfort.** 3M’s Advanced Electret Media (AEM) provides a lightweight, easy breathing combination not found in fiberglass containing filters.
- **Versatile protection.** The 2091 is well suited for a wide range of oil and non-oil based particulate contaminants. Ideal for welding, metal pouring, torch cutting, abatement or as a prefiter for certain chemical exposures.
- **Simplicity.** The versatility of this filter reduces your inventory and training requirements.
- **Compatibility.** The 2091 can be used with 3M’s wide variety of half and full facepiece designs.
- **Exceptional filter efficiency.** Passing NIOSH’s P-series test criteria, the 2091 P100 filter provides a minimum 99.97% filter efficiency.

**Suggested Applications**
- Welding
- Brazing
- Torch cutting
- Metal pouring
- Soldering
- OSHA substance specific particle exposures:
  - Lead
  - Asbestos
  - Cadmium
  - Arsenic
  - 4,4’—Methyleneedianiline (MDA)
- Pharmaceutical manufacturing

**Use For:**
- Solid such as those from processing minerals, coal, iron ore, cotton, flour, and certain other substances.
- Liquid or oil based particles from sprays that do not also emit harmful vapors.
- Metal fumes produced from welding, brazing, cutting and other operations involving heating of metals.
- Radioactive particulate materials such as uranium and plutonium.
- Asbestos.

**Do Not Use For:**
Gases and vapors, including those present in paint spray operations, unless combined with approved chemical cartridges. Sandblasting. Aerosol concentrations that exceed 10 times the OSHA PEL, with half facepiece, or 50 times the PEL with full facepiece; or applicable government regulations, whichever is lower. This respirator filter does not supply oxygen.

**Time Use Limitation:**
If filter becomes damaged, soiled, or breathing becomes difficult, leave the contaminated area and dispose of the filter. If used in environments containing only oil aerosols, dispose of filter after 40 hours of use or 30 days, whichever is first.

2097 P100 Particulate Filter with Nuisance Level Organic Vapor Relief
The 3M 2097 P100 Particulate Filter has been developed with your respiratory needs in mind. Specially designed carbon layers remove nuisance levels of organic vapors.

The 2097 provides you and your workers:
- Comfort. 3M's Advanced Electret Media (AEM) provides a lightweight, easy breathing combination not found in fiberglass containing filters.
- Versatile protection. The 2097 is well suited for a wide range of oil and non-oil based particulate contaminants. Ideal for welding, metal pouring, torch cutting, abatement or as a prefilter for certain chemical exposures.
- Simplicity. The versatility of this filter reduces your inventory and training requirements.
- Compatibility. The 2097 can be used with 3M's wide variety of half and full facepiece designs.
- Exceptional filter efficiency. Passing NIOSH's P-series test criteria, the 2097 P100 filter provides a minimum 99.97% filter efficiency.

Suggested Applications
- Chemical manufacturing
- Undercoating
- Welding
- Brazing
- Soldering
- Torch cutting
- Metal pouring
- OSHA substance specific particle exposures:
  - Lead
  - Asbestos
  - Cadmium
  - Arsenic
  - 4,4,-- Methyleneedianiline (MDA)
- Pharmaceutical manufacturing

Use For:
- Solids such as those from processing minerals, coal, iron ore, cotton, flour, and certain other substances.
- Liquid or oil based particles from sprays that do not also emit harmful vapors.
- Metal fumes produced from welding, brazing, cutting and other operations involving heating of metals.
- Radioactive particulate materials such as uranium and plutonium.
- Asbestos.
3M Particulate Filters

- Organic vapors below the OSHA PEL or applicable government standards, whichever is lower. 3M recommended for ozone protection up to 10 times the OSHA PEL.

Do Not Use For:
Gases and vapors above the OSHA PEL, including those present in paint spraying operations, unless combined with approved chemical cartridges. Sandblasting. Aerosol concentrations that exceed 10 times the OSHA PEL, with a half facepiece, or 50 times the PEL with a full facepiece or applicable government regulations, whichever is lower. This respirator filter does not supply oxygen.

Time Use Limitation:
If filter becomes damaged, soiled, or breathing becomes difficult, leave the contaminated area and dispose of the filter. If used in environments containing only oil aerosols, dispose of filter after 40 hours of use or 30 days, whichever is first.

5N11 and 7N11 N95 Particulate Filters
The 5N11 and the 7N11 N95 particulate filters are NIOSH certified and offer particulate protection against certain non-oil containing aerosols. Both the 5N11 and 7N11 provide a minimum filter efficiency of 95%.

5N11 N95 Filter
For use on 3M 5000 Series Respirators and 6000 Series Cartridges with 501 Prefilter Retainer.

7N11 N95 Filter
For use on 3M 7000 Series Cartridges with 7287 Cartridge Retainer and N95 Prefilter. Also for use as N95 stand-alone particulate filter with 7289 Filter Retainer.

Protection and Performance
- Advanced filter construction reduces linting, helping to ensure exacting results during painting and refinishing operations.
- Meets NIOSH 42 CFR 84 N95 requirements.
- Filter design helps prevent rapid clogging from non-oil paint aerosols.

Comfort and Versatility
- Low-profile and light-weight design for improved comfort and worker acceptance.
- The 5N11 and 7N11 filters can be used with an assortment of facepieces, both in half facepiece and full facepiece configurations.

Use For:
Solids and non-oil based particles including paint sprays (with appropriate cartridges).

Do Not Use For:
Oil containing aerosols.

5P71 P95 Particulate Filter

The 3M 5P71 P95 Particulate Filter offers simplicity and ease of use while helping to provide reliable worker protection against certain oil and non-oil containing aerosols. It passes NIOSH testing criteria providing a minimum filter efficiency of 95%.

For use on 3M 5000 Series Respirators and 6000 Series Cartridges with 501 Prefilter Retainer.

- **Meets NIOSH 42 CFR 84 P95 requirements.**
- **P-series filter features Advanced Electret Media (AEM), appropriate for both oil and non-oil containing environments with extended time-use limitations.**
- **Comfort and versatility.** Advanced electrostatically charged microfibers allow for a low-profile design and easier breathing filter. The 5P71 filters can be used with the 5000, 6000 and 7000 series in both half facepiece and full facepiece configurations.

**Suggested Applications**
- Spray painting
- Lacquering
- Petrochemical manufacturing
- Chemical manufacturing
- Paper processing
- Boat manufacturing
- Lab settings
- Pesticide spraying Agriculture

**Use For:**
- Oil and non-oil based particles including paint sprays and pesticides (with appropriate gas and vapor cartridges).

**Do Not Use For:**
- Asbestos, lead, cadmium, arsenic or sandblasting.
- Do not use above maximum use limitations established by OSHA or applicable government standards.

7093 P100 Particulate Filter

The 3M 7093 P100 Particulate Filter helps provide workers with the protection they need from certain harmful particles, while offering them comfort, versatility and simplicity.

**Features/Benefits**
- **Meets NIOSH 42 CFR 84 P100 requirements.**
- **Protection.** Helps provide protection against certain dusts, fumes, mists, radionuclides, and asbestos-containing dusts and mists.
- **Versatility.** Can be used with a variety of facepieces, both in half face and full face configurations. The 7093 filter is compatible with the 3M 6000 Series Half Mask Facepiece, the 3M 7000 Series Half Mask Facepiece with bayonet attachments and the 3M 7800 Full Facepiece equipped with 701 adapters.
- **Comfort.** Low profile, compact design helps provide workers with an improved field of vision. It is lightweight for enhanced comfort, longer wear and better acceptance.

Half and Full Facepiece
Respirators 7000 Series
Interchangeable cartridges/filters for optimum protection
3M Half and Full Facepiece Respirators 7000 Series are designed to accommodate a wide variety of cartridges, filters and combinations. These are durable and proven respirators that can be used in many applications and provide maximum comfort, versatility and reliability.

Features/Benefits
• The half and full facepieces are each available in 3 sizes (small, medium, large) to comfortably fit many faces.
• Low-profile design of the facepiece and cartridges/filters improves visibility.
• Half facepieces are available in rubber or silicone.
• Half facepieces have a four-point strap attachment with convenient front-strap adjustment.
• N95, P95 or P100 filters can be used in combination with extra large inhalation and exhalation valves for easier breathing.
• The full facepiece has double-flange face seal and six adjustable straps to help provide a secure fit.
• The full facepiece is available as an air purifying respirator or with a variety of positive pressure assemblies.

- 7300S: Large (Silicone)

**Full Facepieces**
- 7800S: Small
- 7800M: Medium
- 7800L: Large
3M 7000 Series Cartridges
(Cannot be used with 7001, 7002, 7003 half facepieces)

- 7251: Certain organic vapors
- 7252: Chlorine, hydrogen chloride, and sulfur dioxide or chlorine dioxide or hydrogen fluoride (escape only)
- 7253: Certain organic vapors, chlorine, hydrogen chloride, and sulfur dioxide or hydrogen fluoride
- 7254: Ammonia and methylamine
- 7275: Formaldehyde or certain organic vapors
- 7276: Certain organic vapors, chlorine, hydrogen chloride, chlorine dioxide, sulfur dioxide, hydrogen sulfide (escape only) ammonia/methylamine, formaldehyde or hydrogen fluoride

3M 7800S Full Facepiece Replacement Parts

- 701: Cartridge/Filter Adapter
- 6895: Inhalation Gasket
- 7282: Inhalation Valve
- 7283: Exhalation Valve
- 7881S: Nose Cup Assembly/Silicone
- 7882: Nose Cup Valve Assembly
- 7883: Neck Strap Assembly
- 7884: Lens
- 7885: Lens Frame Kit
- 7886: Removable DIN Connector
- 7887: Inhalation Valve Gasket
- 7890: Full Face Plug
- 7891: Cartridge Holder
- 7893S: Head Strap Assembly, Silicone
- 7894: Eyeglass Frame and Mount
- 7895: Speaking Diaphragm Kit
- 7899-25: Lens Cover (25 pack)
- 7899-100: Lens Cover (100 pack)
- 7914: Band Clamp
- 7915-5: Tyvek Shroud
- 7916-5: Breathing Room Assembly
- 7918: Exhalation Valve Cover
- 7925: Spectacle Kit
- 7931: Autodarkening Lens (Shade 9,10, 11, 12)
- 79813: Small Nose Cup Assembly/Silicone
- 7986: Tinted Lens Cover
- 7988: Welder’s Face Shield, Autodarkening
- 7989: Full Facepiece Button
- 7993: Welder’s Shroud
- 7994-5: Welder’s Face Shield Retainer Spring
- 7995-10: Welder’s Face Shield Chipping Window Gasket
- 7996-10: Welder’s Face Shield Gasket
- 7997-100: Welders Face Shield Chipping Window
- 7998: Welder’s Face Shield Kit
- 7999: Air Inlet Gasket
- 9891: Filter Holder with Gasket

7000 Series Filters and Retainers

- 7N11: N95 Filter (Can be used as stand-alone filter (with 7289 retainer) or as filter with cartridge (with 7287 retainer).
- 7090: P100 Filter (Can be used as a stand-alone filter (with 7288 retainer) or as a filter with cartridge (with 7287 retainer).
- 7287: Cartridge Retainer (Use with 7000 Series Cartridges alone or in combination with 7N11 and 7090 Filters)
- 7288: Filter Retainer (Use with 7090 Filter)
- 7289: Filter Retainer (Use with 7N11 Filter)
Half and Full Facepiece Respirators 6000 Series

Unmatched performance and comfort. 3M Respirators 6000 Series provide low-maintenance and offer the user comfort and convenience coupled with the cost savings of a reusable respirator.

Features/Benefits

- Used with 3M Filters and Cartridges, these respirators are among the lightest available.
- The swept back design of the cartridges improves balance and visibility.
- 6000 series facepieces cost about half as much as typical reusable respirators.
- Remarkably comfortable, soft, lightweight facepiece and easy-to-adjust head straps.
- Reusable. Just dispose of the cartridges/filters when used to capacity.
- Can be disassembled, cleaned and reused.
- NIOSH approved for negative pressure air purifying and positive pressure dual airline applications.
- Supplied with reclosable storage bag.
- The half and full facepieces are each available in 3 sizes (small, medium, large) to comfortably fit many faces.

The 6000 Series respirators can be used in dual airline mode:

- Available with both back mounted and front-mounted breathing tubes.
- Systems can be used in combination with the NIOSH 42 CFR 84 approved 3M 2000 Series Filters or 3M 6000 Series Cartridges and P100 Filter/Cartridge.
- Cartridge/filter connections provide negative and positive pressure capability in one respirator assembly.
- Can be used on both high and low pressure systems.
- Wearer can disconnect and reconnect the airline hose at the air regulator. When the hose is disconnected, the system automatically changes to filters/cartridges for negative pressure protection – then back to positive pressure protection with a simple reconnection of the airline.
- Small diameter breathing tubes are simple to work with and easy to clean and decontaminate.
Half Facepieces
6100  Half Facepiece (Small)
6200  Half Facepiece (Medium)
6300  Half Facepiece (Large)

Full Facepieces
6700  Full Facepiece (Small)
6800  Full Facepiece (Medium)
6900  Full Facepiece (Large)

Filters and Accessories which can be used with the 6000 Series Face Masks
2071  P95 Filter
2076HF P95 Filter with hydrogen fluoride, nuisance level acid gas relief
2078  P95 Filter with nuisance level organic vapor acid gas relief
2091  P100 Filter
2096  P100 Filter with nuisance level acid gas relief
2097  P100 Filter with nuisance level organic vapor relief
7093  P100 Filter
5N11  N95 Filter (Use with 501 Filter Retainer)
5P71  P95 Filter (Use with 501 Filter Retainer)
501   Filter Retainer
502   Filter Adapter (Use with 2071, 2091, 7093 Filters)

Cartridges which can be used with the 6000 Series Face Masks
6001  Certain organic vapors
6002  Chlorine, hydrogen chloride, and sulfur dioxide or chlorine dioxide or hydrogen sulfide (escape only)
6003  Certain organic vapors, chlorine, hydrogen chloride and sulfur dioxide or hydrogen sulfide (escape only) or hydrogen fluoride
6004  Ammonia and methylamine
6005  Formaldehyde and certain organic vapors
6006  Certain organic vapors, chlorine, hydrogen chloride, chlorine dioxide, sulfur dioxide, hydrogen sulfide (escape only), ammonia/methylamine, formaldehyde or hydrogen fluoride
6009  Mercury vapor or chlorine gas
60921 P100/Certain organic vapors
60922 P100/Chlorine, hydrogen chloride, and sulfur dioxide or chlorine dioxide or hydrogen sulfide (escape only)
60923 P100/Certain organic vapors, chlorine, hydrogen chloride, and sulfur dioxide or hydrogen sulfide (escape only) or hydrogen fluoride
Full Facepiece Replacement Parts and Accessories for the 6000 Series

Replacement Parts
7883 Neck Strap Assembly
6889 Exhalation Valve
6892 Center Adapter Assembly
6893 Inhalation Valve
6894 Nose Cup Assembly
6895 Inhalation Gasket
6897 Head Harness Assembly
6898 Lens Assembly
6899 Lens Frame Kit

6878 Spectacle Kit
6885 Face Shield Cover
6886 Tinted Lens Cover

Half Facepiece Replacement Parts

6000 Series Replacement Parts
6893 Inhalation Valve
6889 Exhalation Valve
6895 Inhalation Gasket

6000 Series Conversion Kits
To complete a 3M Dual Airline Respirator System, select a facepiece, an adapter kit and an air supply hose. For example: 6800 + SA-2000 + W-9435-I00 = complete system.

Accessories and replacement parts
SA-2000/SA-2000LP
Standard Back-Mounted Adapter Kit
Includes SA-2500 Breathing Tube, GVP-I27 Belt and SA-1009 Air Regulator or SA-1029 Connector (low pressure)

SA-2100/SA-2100LP
Combination Back-Mounted Adapter Kit
Includes 2600 Breathing Tube, OVP-127 Bolt and SA-1009 Regulator or SA-1029 Connector (low pressure). Cartridges/Filters not included.

SA-1000/SA-1000LP
Standard Front-Mounted Adapter Kit
Includes SA-1500 Breathing Tube, GVP-I27 Belt, and SA-1009 Regulator or SA-1029 Connector (low pressure)

SA-1100/SA-1100LP
Combination Front-Mounted Adapter Kit
Includes SA-1600 Breathing Tube, GVP-127 Bolt, and SA-1009 Regulator or SA-1029 Connector (low pressure). Cartridges/Filters not included.
Half Facepiece Respirators 5000 Series

Pre-Assembled for Convenience. Designed for Comfort.

3M Respirators 5000 Series are pre-assembled, have no spare parts and require no maintenance. They offer comfort, convenience and performance.

Features/Benefits

• Available in 3 sizes (small, medium, large) to comfortably fit many faces.
• Resealable storage bag helps keep respirator clean between uses.
• Low profile design provides wider field of vision and greater comfort while wearing goggles or glasses.
• Lightweight design coupled with cradle suspension helps relieve pressure on back of neck and bridge of nose.
• Can be combined with NIOSH P95 and P100 filters for oil and non-oil particles.
• For convenience and simplicity some respirators are packaged with either 3M Filters P95 or P100 along with the 3M Filter Retainers 501 or 3M Filter Adapters 502.

3M Low Pressure Systems, Continuous Flow

**Headgear**
- 7800S (Full Facepiece), available in S, M, L
- 7998 (for passive lens) or 7988 (for electronic lens), Welder’s Face Shield Kit

**For continuous flow applications using supply pressure of 10 to 36 psi and W-9435 1/2” ID hose**

**Air Control Kits**
- W-3196 Air Regulator Kit
  - For use with W-9435 3/8” ID hose.
  - Includes 1 each of the following:
    - W-3187 adapter assembly
    - W-3188 breathing tube
    - W-3194 low pressure connector
    - W-3217 waist belt
    - W-3229 shoulder strap
    - 7990 plug for facepiece port

- W-3497 Low Pressure Adapter Kit
  - Includes 1 each of the following:
    - 7890 plug for facepiece port

- W-3197 Low Pressure Air Regulating Kit
  - For use with W-3032 1/2” ID hose.
  - Includes 1 each of the following:
    - W-3187 adapter assembly
    - W-3188 breathing tube
    - W-3195 low pressure connector
    - W-3217 waist belt
    - W-3229 shoulder strap
    - 7890 plug for facepiece port

**Air Supply Hoses**
- W-3435* 3/8” High Pressure Hose
  - Available in 25’, 50’, 100’ lengths

- W-2806 (3 outlets)
  - Panel Mount (Particulate filter with removal of nuisance level hydrocarbons)

- W-2500 (4 outlets)
  - Portable with CO Monitor and CO Filtration

- W-2500 (8 outlets)
  - Portable with CO Monitor, without CO Filtration

- W-9435* 3/8” High Pressure Coiled Hose

- W-3020 1/2” Low Pressure Hose
  - Available in 25’, 50’, 100’ lengths

**Purification Panels**
- 256-02-00 (4 outlets)
  - (Portable with CO Monitor and CO Filtration)

- 256-02-01 (8 outlets)
  - (Portable with CO Monitor, without CO Filtration)

- W-2500 (3 outlets)
  - Panel Mount (Particulate filter with removal of nuisance level hydrocarbons)

- 256-02-02 (8 outlets)
  - (Portable without CO Monitor and CO Filtration)

* Also available with stainless steel fittings. (When ordering, add $5 to Product Number, e.g. SA-2500SS)
3M High Pressure Systems, Continuous Flow

Headgear

- 7800S (Full Facepiece) available in S, M, L
- 7988 (for electronic lens)
- W-3241 Half Facepiece Airline Conversion Kit

For continuous flow tight fitting or 7000 Series applications

Air Control Kits

- W-3061 Air Regulating Assembly
  • Includes 1 each of the following:
  • W-3062 air regulating valve
  • W-3187 adapter
  • W-3188 breathing tube
  • W-3117 waist belt
  • W-3329 shoulder strap
  • 7980 plug for facepiece port

- W-3461 High Pressure Air Regulator Kit
  • Includes 1 each of the following:
  • W-2909CV air regulator valve
  • W-2963 waist belt
  • W-3264 breathing tube
  • 7890 plug for facepiece port

For continuous flow tight fitting check valve airline applications

Air Supply Hoses

- W-9435* 1/2" High Pressure Hose
- W-2529 3/8" High Pressure Coiled Hose

For maximum hose length, see table of air flow delivery on last page.

Purification Panels

- 256-02-00 (4 outlets) 50 cfm (Portable with CO Monitor and CO Filtration)
- 256-02-01 (8 outlets) 100 cfm (Portable with CO Monitor, without CO Filtration)
- W-2806 (8 outlets) 50 cfm (Panel Mount, Particulate filter with removal of nuisance level hydrocarbons)
- 256-02-02 (8 outlets) 100 cfm (Portable without CO Monitor and CO Filtration)
Air Purifying Respirators with filters provide respiratory protection against aerosols by removing dusts, mists, fumes, fibers, and other particles. Filters do not remove gases or vapors, or correct for oxygen deficiency.

End of service life for filters is normally determined by the increase in breathing resistance sensed by the user. When it becomes difficult to breathe comfortably, the filters should be replaced. R95 filters are limited to a maximum of 8 hours use, when used in atmospheres containing oil.

North: Respirators

**Gas & Vapor Cartridges**

North offers an extensive line of gas and vapor cartridges and particulate filters to satisfy numerous industrial applications. All North cartridges and filters are approved with all North air-purifying half masks and full facepiece respirators. One line of cartridges and filters will simplify your inventory.

Air-Purifying Respirators with cartridges provide respiratory protection against gases and vapors by using sorbents to purify the inhaled air. Cartridges without filters do not remove dusts, fibers, and other particles. End of service life for gas and vapor cartridges is determined by either:

- an end-of-service-life indicator (ESLI) certified by NIOSH, or
- the employer must implement a change schedule to ensure cartridges are changed before the end of their service life.

North Safety Products has developed cartridges with a REAL-TIME ESLI™ for Ammonia, Hydrogen Chloride, Hydrogen Fluoride, Sulfur Dioxide and Hydrogen Sulfide. Where an ESLI does not exist, North has developed the ezGuide™ software program designed to help the user develop change schedules for North gas and vapor cartridges. ezGuide will also determine the appropriate types of respiratory and hand protection required. See page 33 for more information.

**North: Respirators**

**HALFMASK**

**AIR-PURIFYING RESPIRATOR**

**7700 SERIES SILICONE HALF MASK**

The 7700 Series is the most comfortable and durable half mask available. Its soft non-allergenic silicone seal provides excellent protection, comfort and fit. The half mask cradle suspension system allows the facepiece to seal evenly on the face without creating pressure points. Its low profile gives workers a wide field of vision and does not interfere with protective eyewear. The low inhalation and exhalation resistance of the 7700 Series makes breathing easier to reduce worker fatigue.

**features and benefits**

- Silicone facepiece material conforms to facial features and doesn’t harden with age. Silicone is easy to clean, extremely durable and resists distortion ensuring a better fit, time after time.
- Contoured sealing flange and cradle suspension system eliminates discomfort caused by pressure points on facial nerves. Design of nose area provides excellent comfort and fit.
- Minimal dead air space improves worker comfort by limiting re-breathing of exhaled air.
- Direct cartridge to facepiece seal minimizes replacement parts and simplifies maintenance.
- Three overlapping sizes will comfortably fit most users.
- North 7700 Series Half Masks are compatible with all North cartridges, filters and accessories.

*770030L HALF MASK SHOWN WITH N75003 CARTRIDGES*
AIR-PURIFYING RESPIRATOR

5500 SERIES LOW MAINTENANCE HALF MASK

The North 5500 Series incorporates the comfortable and efficient design of the popular 7700 Series half mask with the low cost and convenience of a disposable. All parts are replaceable, extending the useful life of the respirator.

features and benefits
- Made of an extremely soft non-allergenic elastomer for comfort and fit. Contoured sealing flange eliminates discomfort caused by pressure points on facial nerves. Design of nose area provides excellent comfort and fit.
- Low dead air space improves worker comfort by limiting re-breathing of exhaled air.
- Direct cartridge to facepiece seal minimizes replacement parts and simplifies maintenance.
- Three overlapping sizes comfortably fit most users.
- North 5500 Series Half Masks are compatible with all North cartridges, filters and accessories.

Respirator Convenience Packs

The 5500 Series is available in easy-to-order convenience packs. Convenience packs combine the most commonly used gas and vapor cartridges and/or particulate filters with the 5500 Series Half Mask, to form a complete respirator. See pages 16 and 17 for a description of gas and vapor cartridges and particulate filters.

North: Respirators

FULL FACEPIECE
AIR-PURIFYING RESPIRATOR

7600 SERIES SILICONE FULL FACEPIECE

The 7600 Series Full Facepiece respirators are designed to provide eye, face and respiratory protection while ensuring optimal comfort and performance. Its dual flange silicone seal gives this facepiece superior fitting characteristics. The hard-coated polycarbonate lens provides over 200° field of vision and protects the wearer’s eyes and face against irritating gases, vapors and flying particles. The lens also provides excellent optics, is scratch resistant and meets ANSI standards for impact and penetration resistance. The 7600 Series Full Facepiece sets the standard for full facepiece protection.

features and benefits

- Silicone facepiece material conforms to facial features and doesn’t harden with age. Silicone is easy to clean, extremely durable and resists distortion, ensuring a better fit time after time.
- Oral nasal cup reduces fogging and lessens dead air space to improve worker comfort by limiting re-breathing of exhaled air.
- Speaking diaphragm makes communication easy.
- Five-strap harness provides an effective and comfortable facepiece to face seal.
- Chin cup helps to position the facepiece properly.
- Neck strap allows wearer to park respirator when not in use.
- Two overlapping sizes, small and medium/large, will comfortably fit most users.
- North 7600 Series Full Facepieces are compatible with all North cartridges, filters and accessories.

The 5400 Series provides the comfort and protection you would expect from North, at an unbeatable price. No other full facepiece in its price range offers such quality, engineering and attention to detail. Weighing only 14 ounces, the 5400’s lightweight design offers a level of comfort that ensures greater worker acceptance. Plus, its facepiece seal is made from a soft, pliable elastomer material with high chemical resistance to assure excellent comfort, fit and performance.

**features and benefits**

- Each facepiece comes with three peel-away windows, six respirator wipes and a storage bag.
- Oral nasal cup reduces fogging and lessens dead air space to improve worker comfort by limiting re-breathing of exhaled air.
- Chin cup helps to position the facepiece properly.
- Hard-coated polycarbonate lens affords an over 200° field of vision, provides excellent optics, is scratch resistant and meets ANSI standards for impact and penetration resistance.
- Two overlapping sizes, small and medium/large, will comfortably fit most users.
- With many of the same components of the 7600 Series facepiece, replacement part inventory will be reduced.
- North 5400 Series Full Facepieces are compatible with all North cartridges, filters and accessories.

**North: Respirators**

**FULL FACEPIECE WELDING RESPIRATORS**

The North Full Facepiece Welding Respirators have a welding shield constructed of a fire resistant thermoplastic material, that can be lifted upward on a locking hinge for a wide-angle view of the work area. It is available as a complete respirator or as an attachment, to convert your existing North 7600 Series or 5400 Series Full Facepiece.

**BP1002 BACKPACK ADAPTER**

The backpack adapter allows users to locate cartridges and filters out of the work zone, by placing them on the user’s back. The BP1002 is easily adaptable to all North Full Facepiece and Half Mask air-purifying respirators, simply by attaching it to the facepiece cartridge connectors. It is ideal for tight or highly heated work places such as those encountered in welding operations. Think of it as an extension cord for your cartridges.

North: Respirators

**RESPIRATORS**

**CF2000 SERIES CONTINUOUS FLOW AIRLINE RESPIRATOR**

The CF2007 Interchangeable Breathing Tube easily converts an air-purifying respirator into a continuous flow respirator. It is easily adaptable to the North 5500, 7700, 5400, or 7600 Series air-purifying facepieces, simply by removing the cartridges and attaching the interchangeable breathing tube to the facepiece cartridge connectors. No modifications, tools or extra components are needed. Using common facepieces for air-purifying and supplied air applications will reduce inventory and maintenance costs. It will also simplify your respiratory training and compliance with OSHA requirements for annual fit testing.

Designed to rest on the user’s back, out of the work zone and worker’s way, the CF2000 Series breathing tube allows workers to function for long periods of time in toxic environments that are not Immediately Dangerous to Life or Health (IDLH) by supplying a continuous flow of breathing air. North quick-connect couplers and air supply hoses must be ordered separately.

**features and benefits**

- Utilizes North halfmask and full facepieces, giving the user the advantages of these industry-leading products.
- Its two-piece hose is engineered to be soft and flexible where it attaches to the facepiece, reducing strain on the face seal, while providing rugged protection against kinking and shut-off when exposed to the work area.
- Its durable, ergonomically designed control valve monitors air flow as required by the user.
- Its wide adjustable belt will not “cut” into worker’s side when dragging an air supply hose.

NOTE: Cartridges / filters, quick connectors and air supply hoses sold separately
North offers three models of Emergency Escape Breathing Apparatus (EEBA) in five and ten minute units. Model 845 provides an average of 42 lpm of airflow for five minutes, and the 850 provides 42 lpm for ten minutes. The Model 855 provides a higher average flow, 75 lpm, for five minutes, which is ideal where escape routes require high levels of exertion. The 855 also features a unique diffuser/muffler system to reduce noise inside the hood.

All models feature a transparent hood made of durable polyurethane for superior visibility. To minimize fogging, a deflector blows incoming air onto the lens. After use, the hood can be detached for replacement or cleaning. The cylinder is lightweight and refillable. An optional molded carrying case and wall-mounting bracket are also available.

**features and benefits**
- Pressure reducing valve with simplified design reduces repair costs and maintenance.
- Simple to use on/off valve with pressure gauge to easily test and check air cylinder pressure
- High visibility carrying bag and carrying strap system can be easily found in an emergency.
- Pictorial user instructions on bag are easy to understand in an emergency situation.

**Part#** | **Description** | **Packaging**

North: Respirators

800 SERIES SELF-CONTAINED BREATHING APPARATUS

SCBA’s provide the wearer with the highest level of respiratory protection available. Because the cylinders are worn on the back of the worker, the SCBA’s are completely portable, enabling the worker the maximum mobility for crucial applications such as emergency response or rescue. The 800 Series utilizes the North soft silicone full facepiece design with dual sealing flange, oral / nasal cup and polycarbonate lens with greater than 200° field of vision.

**features and benefits**
- Utilizes either a thirty or sixty minute cylinder containing pressurized air which is delivered “on demand” to the facepiece.
- The reducer / regulator has only three moving parts, a “fail-open” design and protective housing.
- The demand valve is a “First Breath Release” design, and provides greater than 300 liters per minute upon peak inhalation.
- The Kevlar® / Nomex® / PBI® harness and back plate assembly is designed for comfort and proper weight distribution during the most rigorous jobs.
- A patented speaking diaphragm / exhalation valve assembly offers clear intelligible voice transmission.
- Comes equipped with a luminous pressure gauge, stainless steel whistle assembly and locking quick-connects.
- All 800 Series SCBAs include a carrying case. A wall mounting case can be purchased separately.

Model 832 SCBA is a low cost and worry free unit designed specifically for use in non-fire emergency situations, for egress from a contaminated area, or for clean up of chemical / toxic spills and accidents. It is easy to use, easy to maintain and extremely durable.

The Model 832 utilizes the North soft silicone full facepiece design. The reducer / regulator has only three moving parts, a “fail-open” design and protective housing. Its comfortable and adjustable polypropylene harness system and ergonomically designed aluminum back plate provides user comfort and ease of adjustment. Carrying case can be purchased separately.

Warning: If more than one hose is required, join the hoses together. Do not use couplers between hose lengths. Only one 12 1/2 ft. or 25 ft. length of hose should be used in combination with any hose length to a maximum of 300 ft. OSHA requires that couplers not be interchangeable with any couplers used for non-breathing air or gas systems.

with 1/4" NPT female thread
with 3/8" NPT male thread
with 3/8" NPT female thread

NOTE:
- Components above dashed line are required for NIOSH Approved Respirator
- Components below line are optional
- 3/8" I.D. hoses have 1/4" NPT thread and 1/2" hoses have 3/8" NPT thread.

WARNING:
- OSHA requires that couplers not be interchanged with any couplers used for non-breathing air systems.
- Use of couplers between hose lengths voids NIOSH approval
85400A and 85500A Series Pressure Demand Airline Respirators*

The 85400A and 85500A Series are full facepiece pressure demand supplied air respirators. Both Series feature the popular North silicone full facepiece for comfort and fit. The manifold assembly features two inlet ports, allowing the worker to connect to a second air source before disconnecting from the first. The 85400A is designed for use in atmospheres that are not immediately dangerous to life and health (non IDLH). The 85500A Series is equipped with low profile emergency escape air cylinder(s), making it ideal for escape in tight spaces. Cylinders are available for either 5-minute or 10-minute configurations, and may be used in IDLH atmospheres.

**features and benefits**

- Unique speaking diaphragm/ exhalation valve assembly offers clear communication.
- First breath demand valve with purge button prevents wearer from operating in a demand mode and makes it easier to put on the facepiece.
- May be used without emergency escape cylinder, or with 5-minute or 10-minute cylinder configurations for versatility on the job.

85700 Series Combination PDAR and Air-Purifying Respirator*

The 85700 Series is a combination of a Type C pressure demand supplied-air respirator and an air-purifying particulate filter respirator specifically designed for use in atmospheres containing particulate matter where an airline is used, but where escape can be accomplished using an air-purifying respirator. Approved with 7580P100 cartridges only.

85300 Series Continuous Flow Airline Hood Respirator*

The 85300 Series assures the wearer superior comfort, clear vision and excellent mobility. It offers excellent protection against airborne contaminants in a variety of applications including spray painting, abatement, pharmaceutical manufacturing and chemical handling.

Replacement hoods are available in Tyvek® fabric and a Saranex® coated Tyvek in regular and extended bib. Replacement hoods, peel-away cover lenses and North quick-connect couplers and air supply hoses must be ordered separately.

Features and benefits
- The headgear ratchet assembly easily adjusts for personal comfort and fit.
- Airline hoods are lightweight, quiet and easily fit over facial hair and eyeglasses for greater comfort and better worker acceptance.
- The breathing tube is non-kinking to reduce the chance of collapse or air restriction.
- Non-fogging lens offers a wide field of view and a clear view of the work zone.
- Disposable hoods and the peel away cover lens will reduce cleaning and maintenance costs.

Airline hood assembly including hood, ratchet suspension, breathing tube and waist belt.

Vortex Tube for 85300 Series Hood Respirator

The vortex tube provides greater comfort to the worker by cooling or warming the breathing air. It is color coded and simple to use. Air temperature can be adjusted to warm or cool the air by plus or minus 30°F. The vortex tube comes pre-assembled with Hansen (HV), Schrader (SV) or Snap-Tite (STV) couplers. For use with 85300 Hoods for either heating or cooling.

North: Respirators

**CFR-1™ Comfort Fit Respiratory System**

North’s new CFR-1 reusable particulate respirators give workers the comfort and protection they deserve at a much better value than ordinary dust masks. Ordinary dust masks quickly get warm, moist and uncomfortable and are often replaced several times a day. The filter in the CFR-1 does not touch the face keeping it cool and dry, and one filter can provide all day protection. The facepiece is reusable, and replaceable filters will save money and reduce waste.

**features and benefits**

- Soft thermoplastic elastomer seal provides maximum comfort to ensure greater worker acceptance.
- Exhalation valve removes air quicker for easier and cooler breathing.
- Inhalation valve keeps the filter drier and allows the user to perform a positive pressure seal check.
- Adjustable harness system will ensure a comfortable and secure fit.
- Parking mechanism provides a convenient place to put respirator when not in use.
- N95 and R95 filters available for a wide range of applications.
- Three sizes to comfortably fit most users.

The CFR-1 Welding Respirator comes with a stainless steel mesh cover to protect the user from heat, sparks and slag.

**Pump & Kit Selection... in Three Simple Steps**

Choice of models: 1/4 HP, 3/4 HP, 1-1/2 HP to meet a variety of applications. Pumps are available individually or as a kit with facepiece or hood, hose and couplers. Economical and easy to maintain.

### STEP 1

**Select your Facepiece**

#### 7600 Series
Silicone full facepiece has dual flange for superior fit. Polycarbonate lens offers wide field of vision. Nose cup and speech diaphragm are standard. Also available with a welding attachment. Two sizes (small & medium/large)

**Use with the CF2007 Breathing Tube**

- **760008A, S** Full Facepiece
- **760008AW, SW** Full Facepiece with Welding Attachment (not shown)

#### 7700 Series
The most comfortable and durable half mask available. Non-Allergenic silicone for excellent fit and protection. Three sizes (small, medium, large)

**Use with the CF2007 Breathing Tube**

- **770030S, M, L** Half Mask

#### 5400 Series
Provides the comfort and the protection you need at an unbeatable price. Facepiece seal is made from soft elastomer material with high chemical resistance. Nose cup is standard. Also available with a welding attachment. Two sizes (small and medium/large)

**Use with the CF2007 Breathing Tube**

- **54001, S** Full Facepiece
- **54001W, SW** Full Facepiece with Welding Attachment (not shown)

#### 5500 Series
Made of soft elastomer for comfort and fit. Contoured sealing flange eliminates pressure points on facial nerves.

**Use with the CF2007 Breathing Tube**

- **550030S, M, L** Half Mask

#### CF2007 Breathing Tube
Convert the North full facepiece and half masks into a continuous flow respirator. Attaches easily to the cartridge connectors without any modifications, tools or extra adapters. Assembly includes an adjustable flow valve and belt.
North: Confined Space Respirators

**7800 Series**
Silicone full facepiece with breathing tube and cartridge connectors. May be used in the negative pressure mode for entry/exit or emergency escape from non-IDLH environments. Assembly includes breathing tube and belt. Available with fixed or adjustable flow, in two sizes (small & medium / large)

Cartridges and filters sold separately. Refer to the North Respiratory Catalog for a complete listing.

| 78005, S | Fixed Flow |
| 78006, S | Adjustable Flow |

**Cartridges and Filters Sold Separately**
- **7580P100**: P100 Filters
- **7581P100**: Organic Vapor / P100 Cartridge Filter Combination
- **N75001**: Organic Vapor Cartridge

**85300 Series**
Lightweight hoods fit easily over hair and eye glasses. Ratchet suspension for easy adjustment. Available in Tyvek® or Saranex® Coated Tyvek, with or without bib. Assembly includes breathing tube and belt.

*Not for use with 86600 ambient air pump*

- **85301T**: Tyvek Hood
- **85301S**: Saranex Coated Hood
- **85301TB**: Tyvek Hood, Bibbed
- **85301SB**: Saranex Coated Hood, Bibbed

---

**STEP 2**
Select your Hose Assembly

**Use with 86600 or 86610 Ambient Air Pumps**

**888050H**
(1) 50 ft air hose, 1/2” ID #888050
(1) Hansen coupler assembly #88800H

**888100H**
(1) 100 ft air hose, 1/2” ID #888100
(1) Hansen coupler assembly #88800H

**Use with 86630 Ambient Air Pump**

**888050HAP1.5**
(1) 50 ft air hose, 1/2” ID #888050
(1) Hansen female coupler #880060H
(1) Hansen NPT male coupler #970074BN
(1) Hansen male coupler #880161H (for respirator connection)

**888100HAP1.5**
(1) 100 ft air hose, 1/2” ID #888100
(1) Hansen female coupler #880060H
(1) Hansen NPT male coupler #970074BN
(1) Hansen male coupler #880161H (for respirator connection)
